

Flat Screen InvisiSound® VideoMirror™ Frame Sound System

Get the Best in Both Aesthetics and Technology.

Centra's InvisiSound® VideoMirror Frame makes your home theater disappear.

For some, even the most stylish home theater systems don't blend enough into their home. Our solution: make it disappear. Building on their previous design that concealed home theater audio from sight, M-Design™ engineers took their ingenuity one step further to make the display invisible, too, with the InvisiSound® VideoMirror Frame.

Artistic design transitions the modern look of plasma into the home.

Mounted to a Centra Console or hung directly on a wall, the VideoMirror Frame beautifully conceals audio and video components from view. A gorgeous frame with your choice of piano black or light cherry finishes houses reference-quality left, right and center speakers behind detachable grilles, while a two-way mirror featuring M-Design's innovative *SheerSight™* finish reflects room images when the display is off and allows pictures to permeate through when in use.

Patented speaker technology brings your favorite movies and music to life.

Combined with silk dome tweeters, a line array of 2" *Centra Mid-Range* drivers reproduces clear, open audio for delicate passages and powerful dynamic range for loud music and sound effects—all with pinpoint imaging and a wide soundstage. When combined with Centra Subwoofers and Surrounds, it delivers powerful 5.1 surround sound so staggering you may never leave the couch.

Beautiful presentation. Seamless design.

Powerful performance. Centra by M-Design.

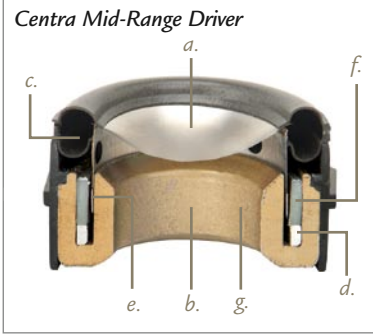

M-Design's innovative SheerSight™ finish allows the video display to permeate through when in use while high-resolution drivers deliver a "wall of sound."

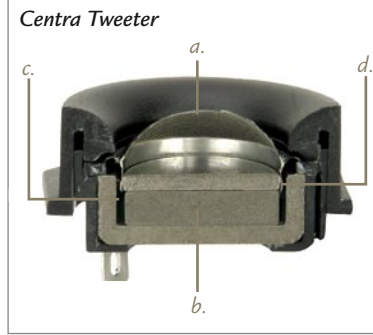

The InvisiSound VideoMirror Frame offers your home theater a "custom-look" without undertaking expensive custom installation.

Patented Centra™ Speaker Technology

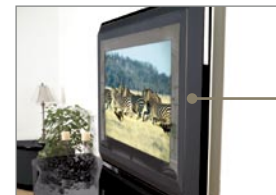

2-Inch Centra Mid-Range Driver:

- a. Inverted titanium diaphragm
- b. High-excursion design
- c. Long-throw, oversized, balanced suspension
