

StreamLine™ Tower 7200 Sound System

Centra StreamLine Towers employ 16 powerful drivers which feature patented magnet structure technology.

Introducing a Sound System Where Beauty and Style Meet Power and Performance

Tall, gorgeous Centra StreamLine Towers blend seamlessly with virtually any décor.

Say goodbye to awkward speaker boxes. With deep gloss piano black grills and an anodized aluminum finish, these beautiful towers are the perfect addition to any home and any system. Optional deep or light cherry grills are also available to pamper your design sensibilities. Whether placed in a living room, den or dedicated entertainment room, they can perform as both front or surround speakers to deliver amazing audio while enhancing your home décor.

Stylishly designed to blend beautifully with any décor, Centra StreamLine Towers also match perfectly with other M·Design home theater products.

Centra Consoles and Component Towers feature the same design cues as the StreamLine Towers. Centra Surrounds and Center Channel Speakers also use the same patented driver technology for power and performance from all corners of the room.

Experience the StreamLine “wall of sound” and the patented technology that drives it.

Line arrays of multiple drivers mean an extra tall sweet spot, surpassing the sound field of ordinary point source 2-way or 3-way speakers. We call it the “wall of sound” because you get powerful audio performance anywhere in the room. Line array technology gives you an entire column (“wall”) of sound as opposed to a single point source where only one speaker produces a full frequency range. The result is low distortion with exceptional dynamic range and incredible power handling.

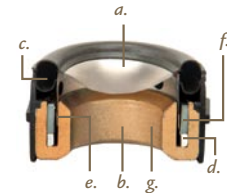

The single wide-dispersion *Audio Focus* line-source tweeter produces crisp highs and pinpoint imaging that you can enjoy without having to sit in the “perfect” spot. Centra StreamLine Towers give you a concert-quality dynamic range for loud music and sound effects and clear, open sound for quiet, delicate passages.

Beautiful presentation. Seamless design. Powerful performance. Centra by M·Design.

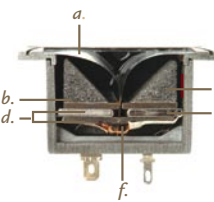

Patented Centra Speaker Technology

Centra Mid-Range Driver

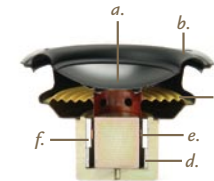

- 2-Inch Centra Mid-Range Driver:**
- Inverted titanium diaphragm
 - High-excursion design
 - Long-throw, oversized, balanced suspension
 - Distortion shorting ring
 - Low-mass voice coil
 - Radial neodymium magnet
 - Extra large air vent

Audio Focus Line Source Tweeter

- 2-Inch AudioFocus™ Line Source Tweeter:**
- Ultra-light silk diaphragm
 - Patented line-source drive for wide dispersion
 - Foam damping material
 - Dual magnetic air gaps for high efficiency
 - High-energy neodymium magnets
 - Patented low-inductance, flat voice coil

Centra Woofer

- 4-inch Centra Woofer:**
- Inverted aluminum diaphragm
 - High-excursion rubber surround
 - Long-throw spider
 - Distortion shorting ring
 - Low-mass voice coil
 - Radial neodymium magnet

Features:

- Towers feature the high-tech look of anodized aluminum with the warmth of hardwood finishing or high-gloss piano black accents
- Line array of patented technology drivers means not one single driver has to be worked, resulting in ultra-fast response with ultra-low distortion for today's movies, music and video games
- 11 qty. 2" *Centra Mid-Range* drivers feature inverted titanium domes and offer high-performance responsiveness
- 4 qty. 4" *Centra Woofer* features inverted aluminum domes and provide a powerful extended frequency range
- AudioFocus™* Line-source Tweeter gives you a wide dispersion audio field for great sound anywhere in the room
- Centra Mid-Range*, *Centra Woofer* and *Audio Focus* drivers feature patented neodymium magnet structures, dual radius half-roll surrounds, and a large diaphragm-to-magnet clearance
- Drivers are magnetically shielded for maximum performance around video equipment
- Bi-wire-ready 24k gold-contact binding posts with jumper straps included
- Internally wired with frequency specific Monster Cable®
- Stylish design matches StreamLine Surround and Center Channel Speakers, M-Bass 1000 Subwoofers, Centra Consoles and other M·Design products (sold separately)

Specifications:

- Model:** MD CEN SLT7200
Dimensions: 72" H X 8.5" W X 9.5" D
Weight: Approximately 53 pounds each
Configuration: Sold in pairs
